

# A Worker Dialogue

Improving Health, Safety and Security at  
the U.S. Department of Energy

Log on and participate starting on Monday June 14, 2010 at

[www.WorkerDialogue.org](http://www.WorkerDialogue.org)

(username: worker -- password: dialogue)

Worker health and safety programs at the Department of Energy (DOE) are most effective when they reflect **your** knowledge and experience as one of DOE's front-line workers. **You will now have the opportunity to share your experience and provide feedback** to help enhance and shape DOE's worker safety initiatives.

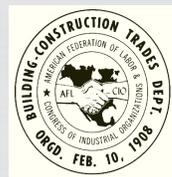

This Worker Dialogue has the support of labor unions and organizations representing front-line workers at DOE.

Beginning on Monday, June 14<sup>th</sup>, the Office of Health, Safety and Security (HSS) at DOE, in partnership with the nonprofit, non-partisan National Academy of Public Administration, will host **A Worker Dialogue: Improving Health, Safety and Security at DOE**. This web-based "conversation" will engage the DOE workforce in an open, online dialogue to discuss challenges, generate innovative ideas and recommend ways to improve worker safety .

This interactive online dialogue will be live 24/7, during which you will be able to log on and join the discussion by submitting ideas and voting and commenting on the ideas of others.

Because the dialogue is hosted by the independent National Academy of Public Administration, it will be a safe, neutral space for participants to openly discuss your experience and perspectives.

Please contact Daniel Honker (202.204.3633) if you have any questions about this Dialogue.

**HAMMER** Training & Education Center

Note that the Worker Dialogue is NOT a safety reporting system or a place to discuss sensitive and classified information. Safety issues, occurrences, and sensitive information must be reported through appropriate DOE designated systems.

This Dialogue ends on July 11, 2010. Visit early and often. For information on the background and purpose of this Dialogue, please visit the following website:
